

Commercial businesses keep the world running by offering the essential goods and services people need. The hustle and bustle of these businesses creates various challenges that can slow operations down. M+A Matting solutions are designed to create safe, clean, and more comfortable environments to help both customers and employees achieve their goals.

## Entrance Matting

As much as 80% of the dirt that enters a facility is tracked in as people enter the premise according to the ISSA. Entrance matting is a vital component of maintaining a high level of appearance and reducing safety hazards and cleaning costs. This proactive measure greatly reduces visitor and occupant exposure while helping you save hundreds of dollars annually in maintenance fees. M+A offers WaterHog mats, a wide selection of outdoor scraper mats, and various carpeted (wiper) mats to place at the entrance of your building.

## Logo Mats

M+A offers several different logo mat options to increase your brand's awareness and leave a lasting impression on your visitors. Logo mats are recommended for use at entryways, in lobbies, at front desks, or anywhere you want to display your company logo, slogan, artwork, or message to customers/visitors or employees. Photographic quality can be achieved and some styles are available in custom shapes.

## Specialty Matting

Using proper matting and floor coverings is an excellent way to help reduce slips and falls in your facility. M+A is committed to safety and offers an expansive line of mats that have been certified high-traction by the National Floor Safety Institute. M+A's product line also includes mats designed for specific applications like restrooms or icy/snow-covered walkways, and disposable adhesive-backed matting for short-term use.

ColorStar® Impressions

WaterHog Impressions HD®

CleanShield® Restroom Mats

CleanShield® Roll Goods (Adhesive-Back Matting)

## Ergonomic Matting

Prolonged standing puts pressure on the feet, leg muscles, spine, neck, and shoulders which can lead to chronic pain, injuries, and muscular disorders. By providing employees with anti-fatigue mats in standing areas, or even at their desks, it can increase productivity and reduce the pain associated with standing for long periods of time. Standing on an anti-fatigue mat at your desk burns calories, reduces energy consumption, alleviates stress to the back and legs, and also reduces fatigue as a whole.

**TuffComfort® Standing Desk Mat**

## Eco-Friendly Matting

By preventing contaminants from entering a facility, mats will substantially reduce the need for cleaning chemicals that might be harmful to building occupants and the environment. M+A is committed to developing and manufacturing eco-friendly products, reusing and recycling materials as often as possible.

**ColorStar®**  
(PET fabric features 100% recycled content reclaimed from plastics)

For more than 50 years, we've been on a mission to develop matting that makes facilities safer, cleaner, and more comfortable.
